

# Docker Swarm (WIP)

On master

```
docker swarm init
```

Copy/Paste docker swarm join on all other nodes

```
docker swarm join --token TOKEN IP_ADDRESS:2377
```

Create a swarm service

```
docker service create --name weather-app --publish published=80,target=3000 --replicas=3  
weather-app
```

List Docker services

```
docker service ls
```
