

Create a Xen pool (cluster)

Connect on master

```
xe pool-list --minimal
```

Create pool with UUID

```
xe pool-param-set name-label="pool.myhypervisor.ca" uuid=<UUID>
```

Edit hostfile with all FQDN's on all nodes

```
vim /etc/hosts
```

```
## masternode.myhypervisor.ca 10.X.X.11
   othernode.myhypervisor.ca 10.X.X.12
```

Connect on other nodes

```
xe pool-join master-address=masternode.myhypervisor.ca master-username=root master-
password=PASSWORD
```

wait 30 sec and check host list

```
xe host-list
```
